

Family Planning

Objectives:

Unmet need for contraceptives is about 26.03% in the state and the unmet need for spacing is higher compared to that of limiting. It is proposed to reduce this unmet need for contraceptives to 20% by 2011-12.

Illustrative Activities:

a. Access to non-clinical contraceptives increased in all villages in the state through community based distribution system and distribution by ASHAs in the villages.

b. Promote accessibility to FP service facility at level

- Promotion of 10 year IUD as an alternative to sterilization.
- Accreditation of Private Institutions:
- Promotion of NSV and male responsibility in family planning in the state.

- Increasing sterilization camps for female and NSV camps in difficult areas.

c. Skill upgradation of HWs:

- Equipping the ANMs with skills to provide IUD services.
- Increasing the access for sterilization methods by training MOs in Minilap and

Female sterilization during Population Stabilization

d. To generate demands and service availability through IEC/BCC/IPC information dissemination.
